

6th Pannonian Symposium on Central Nervous System Injury

5-6 April, 2013 – Pécs, Hungary

Dear Sir/Madam!

The Department of Neurosurgery, University of Pécs organizes the

6th Pannonian Symposium on CNS Injury 2013

on 5-6 April 2013, at Hotel Corso Pécs.

To this prestigious conference we are expecting Hungarian and foreign experts as participants who are all great representatives of neurosurgery.

Main topics:

- Biomarkers, point-of-care diagnostics, neuromonitoring: the role of biomarkers in brain injury therapy
- Diffuse axon/neuron damage in severe brain injury, etiology and therapy of diffuse cerebral edema
- Polytraumatisation, spinal cord injury, spinal cord lesion: etiology, experimental and clinical therapy
- Role of evidence based guidelines in the treatment of brain and spinal cord injury
- Reports on clinical research on CNS injury: STICH-2, STITCH, RESCUEicp, decompressive strategies in cerebrovascular diseases

Accompanying the scientific program we organize a professional exhibition for the companies of the field. We would like to invite your firm to present new products, technologies and innovation.

The host city of Pécs harbors a special medieval atmosphere, with most of the city included in the World's Cultural Heritage designation (UNESCO). Pécs is also a colorful and exciting Central-European city, which not accidentally has been designated the European Capital of Culture in 2010. Those who attended our 5th meeting will also be surprised upon the developments Pécs has undergone in the last three years.

It would be a great help if you could support our conference either according to the categories given on the conference website or in any other way.

Further information, detailed scientific program and application forms for sponsors and exhibitors can be found on the official conference website:
